Comments: I completely disagree with banning pack goats in bighorn sheep areas! There is no conclusive evidence that goats transmit disease to big Horn sheep. If you are going to ban pack goats then you need to ban domestic sheep, regular domestic sheep should not be allowed to graze on public land also. Domestic sheep transmit far more disease than any pack goat will! There needs to be a lot more research done on the subject before any drastic measures are taken! Last I checked it's still a free country and I should be able to hunt/hike with my pack goats on any USA government land period!
