Comments: Thank you for this unique opportunity to examine and elevate the character of our local forest and wilderness. I am writing to support the existing wilderness designation, the working draft of the revision, and the inclusion of the areas recommended by the Community Conservation Proposal (the CCP). New wilderness area designations are a crucial opportunity for the RMP. Included in the CCP recommendations is Kelso Mesa. Spanning an elevation change and the largest roadless area of the Uncompahgre Plateau, Kelso poses a unique opportunity to protect wildlife and waterflows distinct from other wilderness areas of Colorado.

Please also continue to limit drones (STND-WLDN-10) and ban exceptions to party size limits.
