Comments: GMUG Forest Plan Revision

Dear Leaders

Our population and demand on our public resources is only going to continue to grow and explode. My opinion is to provide extremely high levels of protection against over use by the public, mineral extraction, logging and other demands on wildlife and the environment.

It will not impact those of us living today but protection is needed for those of you who have children, grandchildren etc (I have no children but others do). It is for future generations that I desire high levels of protection of our environment.

Thank-you

Janet A. Gallenstein
