Introduction Thank you for the opportunity to comment on the preliminary Grand Mesa, Uncompahgre, and Gunnison National Forest management plan. I am glad the USFS is considering ways to protect important natural resources like wildlife habitat, domestic and irrigation water, wild and scenic rivers, air quality, and recreation. In particular, I support the designation of recommended Wilderness areas and special recreation management areas as mentioned in the Community Conservation Proposal, as well as the Lamborn/Landsend area. These will preserve habitat connectivity, wildlife corridors, undeveloped open space, and recreation opportunities within our region.

I urge the USFS to consider including the Community Conservation Proposal as its preferred alternative in its Draft Forest Management Plan. The Community Conservation Proposal includes protections for wildlife, recreation, wilderness-quality lands, air, and water. It would preserve scenic viewsheds that local communities and economies depend upon. I have a vision for the future that embraces our natural resources instead of exploiting them, and I recommend the USFS consider that when drafting a Forest Management Plan.
Comments My five-year-old son got to go backpacking for the first time this past week and I watched his awareness of resources and beauty grow over the trip. I would really like my son to grow up in a place abundant with natural beauty and don't feel that the short term benefit of extraction is worth the possibility of long term damage to the area.
Conclusion In conclusion, I want to thank the GMUG Forest Planning team for releasing a Working Draft of the Forest Plan revision, however some changes are needed. Most importantly, more management area protections are needed for the incredible wildlife, wilderness, water quality, and recreation values the GMUG National Forests provide surrounding the North Fork Valley. Our community survives based on the values encompassed within the National Forests that surround us, and our ability to access those public lands. I would like those values to be protected in the GMUG Forest Plan.
