Comments: I wish to express my concern with Comprehensive River Management Plan (CRMP) for the three forks of the Flathead River. While no action has been taken as of yet, I understand that management actions may include permitting and limiting the sizes of float groups. While many people use the Flathead River for recreation, I use it to access an inholding in Glacier National Park.

Under Sec. 5. (a) of the Wilderness Act I am guaranteed adequate access to my private property in the park. I believe any attempt to limit my ability to access my property to be in violation of the Act and trigger a remedy. Please take this into consideration when drafting any rules or regulations. Thank you.
