Title:

Comments: I would like to voice my support for the preferred alternative recommended of a combination of regeneration harvests and intermediate treatments across the project area specifically due to this management alternatives ability to improve resilience to the variety of future conditions we have not experienced in the past but are now facing in the future. I would also like to voice support for species selection and forest management help reduce frequency of fire. As an auxiliary benefit, I greatly support the improvement or addition of adequate access roads to enhance the capacity for and effectiveness of fire response.
