Comments: It is with great sadness and regret that I submit these comments on the so called Central Tongass Plan. To embark on a needless pillage and destruction at this point of human history, when mankind ,is busy destroying the whole planet the act of a madman, or a Federal Government refusal to acknowledge that the world as we now know it ,is being put to DEATH with idiotic plans such as this !!! Hello ??? Is there anybody out there who heard the U.N. state that deforestation on this scale further threatens the stability of our poor looted planet ? July, 2019, the hottest month in the world . 2016, 2017, 2018, each year the hottest year in modern recorded history. How about 70,000 thousand fires burning in the Amazon ? How about the record droughts in the Tongass Rainforest.? When does this insanity end ?! To put this plan into effect further degrades our childrens world beyond redemption .You people in the USFS need to say , NO,WE WILL NOT CARRY OUT THIS INSANE IRRESPONSIBLE ACT OF MADNESS ON A PLANET ALREADY DROWNING IN CO2
