Comments: I am requesting that the Forest Service refrain from allowing any logging operations in this area of the forest. I realize that the hardwoods on public land is an important resource and I'm not against logging public lands in general. However, I am against logging in areas that are visited regularly by the public for the purpose of hiking and enjoying nature. This area in particular has become very popular in recent years with regard to the visitation of Pine Island Double Falls. Once the forest is logged the area will be spoiled as a beloved outdoor destination.
