Comments: Thanks for the chance to weigh-in on your proposals for river management. I own a cabin on the North Fork just a little up from its confluence with the Middle Fork. I have read your proposed actions and trigger points and capacity values. My thoughts:

--Require permits for ALL commercial floats on ALL three forks and ALL sections and limit launch numbers at all put-in sites to no more than four per company per day in July and August. Commercial boats are killing our rivers, turning them into rampant for-profit gold mines for owners and a nightmare for us locals. Do we need to commercialize everything?

Thanks.
