Comments: I am begging for this forest to stay alive! Please do not log it and ruin such a beautiful place! This forest produces much needed oxygen, is home to many species of trees, plants and animals! We take education hikes here to learn about the wilderness with our children! I would be heartbroken to see it go because of greed by the logging company. "Only when the last tree falls will human kind wake up and realize they have single handedly destroyed their own planet. " Please, save this forest and let it continue to thrive!
