Comments: I am concerned that this effort could result in a possible opening of Constellation Lane (a private road) to ATV/UTV or other traffic. Hopefully, this is not even a thought but I want to strongly express my profound objection to even this possibility. We pay for this roads upkeep and maintenance and when it was illegally opened by people cutting the forest fence bordering private land, many people began to use this private road as a means to get into the forest. This caused dust and extra maintenance costs and speeding offroad vehicles that also did spins and other actions that destroyed the road. So please, make sure this road is never allowed to be access to the forest. Thanks You.
