Comments: In reading about the reassessed plans for the Pine Creek project, I am very pleased to see positive changes like closing and rehabbing user-made trails along Rockcastle River and especially the change of plans not to do shelterwood cuts 10 years after midstory cuts. Nice work! However, it concerns me that the plan continues for shelterwood cutting 1300 acres. I am no expert, but my personal experience has shown me that cutting that much leads to quick degradation of the land more than anything else. Please again take into consideration the excellent advice of KY Heartwood on these matters. Thank you.
