Title:

Comments: I feel it is never OK to forgo public comment within a lengthy period for any project on public lands. I am against the Sunnyside drilling or any other industrial (be it logging, ranching, etc..) use within that greater ecosystem. While we need raw resources we are not currently doing enough to protect our environment, conserve our resources, or protect the lives and health of our citizens and fellow creatures living on the planet. History clearly shows that when industry arrives the local citizens and environment suffer. The economics are rarely wide spread or lasting. We have to create ways to prevent this as we utilize what we wisely need. Also, quit selling/leasing our land to foreign interests.

Thank you!
