Comments: Please do not take away more of our old-growth trees. This economically marginal activity destroys the wealth we could pass down to future generations. We are paying money to destroy our environmental wealth. I support oil extraction and other mining. But the Tongass will never have a viable 2nd-growth industry. It is too wet, and trees don't grow fast enough. As it is, we are currently sending much of the timber as whole logs to be processed elsewhere. Please stop approving old-growth projects, especially this one!!
