Comments: I probably missed the comment period. I worked in the Rec Program at Tiller for over 30 years. I just wanted to add that Roads 2800-357 and -358 are in a Forest Plan allocation called "Recreation Old Growth Grove" with direction to provide day use interpretive opportunities. There is no mention of how that direction is affected or amended. It could be another reason to support why the roads and dispersed camping are being discouraged. There is also a SU Corridor Recreation Mang. Plan that is not referenced - as far as any changes to specific dispersed site management in that plan. I gave Lance the info after a Skillem field trip in 2017....

Thanks, Lori Depew
