Comments: I am writing to express my strong opposition to the current Sunnyside plan for exploratory drilling in the Patagonia Mountains. The current EA is not sufficient to determine the impact that this exploration will have on this pristine environment.

I am a land owner in Elgin Arizona and have spent hundreds of hours canoeing, swimming, hiking and reveling in the beauty of the Patagonia area. Drilling will cause dramatic stress on the flora and fauna of this region and quite possibly ruin this area for recreation and food production for years to come.

I would strongly advise the Forest Service to do a more comprehensive study (EIS) before they allow this mining company to move forward with exploratory drilling.
