Comments: Dear Project Manager Central Tongass LLA,

I realize the old promotion method in the Forest Service were how many board feet were logged in management decisions. I thought we had passed that point and were interested in overall ecosystem management now with protection of watersheds and unique habitats. The new administration policies regarding land management protection clearly indicate that those decisions are not necessary. I urge you to remind the administration that wild areas are important to future generations of Americans. I am also old enough to realize that past logging practices in the Tongass were underwritten by American taxpayers

Please stand up and protect this beautiful wild Pacific rain-forest from this joke of an administration when it comes to dealing with land and wildlife management policy.

Dear Troy Heithecker, Acting Tongass Forest Supervisor,

I write to ask you to prioritize protecting and restoring important salmon and wildlife habitat and ending the outdated and damaging practice of large-scale old-growth logging. Fishing and tourism, which rely on healthy fish and wildlife habitat and beautiful scenery, account for 26 percent of jobs in Southeast Alaska and combine to contribute \$2 billion to the regional economy. Fishing, hunting, outdoor recreation, and subsistence resources are all important values to residents and visitors and should take precedence over outdated industrial old-growth logging.

While the timber industry was once an important part of Southeast Alaska, the forest products industry now supports less than 1 percent of local jobs. The Forest Service must keep up with the times. Planning another 150 million board-feet of timber over thousands of acres is simply too much given previous old-growth logging. Young-growth logging should avoid the Tongass 77, including areas within Kadake Creek, Port Camden and Security Bay. On North Kuiu Island, in particular, past failed timber sales demonstrate another old-growth timber sale is unwanted even when propped up with millions of dollars in taxpayer subsidies.

Rather than adding to the sprawling clear cuts and spider web of logging roads, the Forest Service should focus on salmon and deer habitat restoration, repairing places where existing roads impede salmon migration, and promoting recreation and subsistence opportunity.

Thanks, Sincerely, Larry Casey
