Comments: Dear Project Manager Central Tongass LLA,

The Tongass is an extremely unique area that should be preserved for future generations. It is essential to a strong salmon population as well as tourism.

Dear Troy Heithecker, Acting Tongass Forest Supervisor,

Please leave the Tongass alone. It is perfect as it is and there is no need for old growth logging. It is far cheaper and more cost effective to log elsewhere. Fishing and tourism, which rely on healthy fish and wildlife habitat and beautiful scenery, account for 26 percent of jobs in Southeast Alaska and combine to contribute \$2 billion to the regional economy. Fishing, hunting, outdoor recreation, and subsistence resources are all important values to residents and visitors and should take precedence over outdated industrial old-growth logging.

While the timber industry was once an important part of Southeast Alaska, the forest products industry now supports less than 1 percent of local jobs. The Forest Service must keep up with the times. Planning another 150 million board-feet of timber over thousands of acres is simply too much given previous old-growth logging. Young-growth logging should avoid the Tongass 77, including areas within Kadake Creek, Port Camden and Security Bay. On North Kuiu Island, in particular, past failed timber sales demonstrate another old-growth timber sale is unwanted even when propped up with millions of dollars in taxpayer subsidies.

Rather than adding to the sprawling clear cuts and spider web of logging roads, the Forest Service should focus on salmon and deer habitat restoration, repairing places where existing roads impede salmon migration, and promoting recreation and subsistence opportunity.

Thanks, Sincerely,

Thomas Mader
