Comments: re 2019-0173 - i oppose this multiple assault on tongass and its logging attacks for profiteering. naturs does best left alne. every action of this usfs assault team is a negative for this area. fs comes in and burns. fs comes in and chemically burns and treats. usfs harms and desroy. everything ends up needing fixing after they come in. the community does not need this fs assault for its welfare. it does quite nicely with tourists coming in to admire the area. that is no excuse for this usfw planned destruction. visitors should ccome in and be awaed by gods magnificence. this planned assaults kills trees, wildife, birds, everythign that makes life worthwhile. leave this site alone. usfs work is a disgrace to america. i oppose all cabin construction. i oppose the logging. i oppose the road construction. t e stakeholder in this are the 328 million ameicans who revere sites like this. this commetn is for the publci record.
