Title:
Comments: Please leave oldgrowth, wilderness and as many trees as possible. The Tongass is our lungs, and help protect against climate change. Please do not cut trees. Without trees there would be no Tongass. Please leave the trees for future generations. Please leave the trees to filter water and protect salmon, and birds and other wildlife. We have to start viewing nature as sacred and start taking care of mother earth and the trees, instead of exploiting as a resource. Protect wilderness, trees, and dont spray pesticides in the national forests for invasive species. The chemicals persist in the food chain and the are worse than the species.
