First name: Dana

Last name: Heck

Organization:

Title:

Comments: I am strongly against anything that restricts our access to our national forests. The forests belong to the people. The economic impact on tourism will be devastating to local economies that are already struggling. Our towns are almost totally dependent on tourism because there are so few good year-round jobs here. Eastern Arizona is going to feel the impact of job losses from the power plants and coal mines that are closing. Please don't hurt our tourism.
