Comments: we were present for both live fire tests, I heard it clearly from not only my home but the properties we own as rentals on hwy 180 ( my tenants in all three of the homes heard as well). i would like to say we are not opposed to a firing range but i am of the noise, we enjoy our porch time in the summer and entertain on same , i feel if it must be in the area you have done the tests on could we not enclose the facility to insure the noise would not be as loud??? i do understand the need to our local law enforcement and community but as a property owner that owns several rental property along 180, i oppose this facility on the grounds of noise and the effect it will have on my property values down the road, i feel my property will become undesirable with a open air shooting range 1 mile from our houses with clearly being able to hear the shooting.

hank you for your consideration
