Comments: Please, dont take away our camping grounds. We have camped and cared for these great white mountian forest for generations now. We are raising our own 3rd generation of children teaching them conservation and care of the forest. The city is taking our childrens minds, bodies, and souls at a great rate. We need to beable to take them out, show then how God created our earth and care for it. Hunting and fishing is a big part of that too. Ww have no problem buying our tags and licences when the monies go to caring for the land too. But, is it going to that? We have seen so many established camp grounds that do not get taken care of as well as we do when camping in the woods. We are free Americans and want to keep it that way. Thank you for listening to the people.
