Comments: I have personally visited the Arizona National Forests to recreate in and around some of the specific areas that you are intending to close. This is quite frustrating! It reduces or eliminates access to OUR land - key word, OUR! We have seen a 90% +/- reduction in OHV access in the South Dakota National Forests where I live and it has led to an incredible amount of over-use and abuse that simply did not occur before the closures; yet, the Forest Service continues to close more and thus cause more resource damage as a result of their own actions. NO MORE CLOSURES! Keep OUR lands open to responsible users!
