Title:

Comments: Please consider the impact on people who physically can not hike the forest. My husband and I are senior citizens and our only way to enjoy the beauty of the Nat. Forest is by ATV. We own a side by side and love to travel the small forest roads. IF you close those roads to ATV traffic only the young or people who own horses will have access.

We should be trying to make our forests more accessible to the disabled not less accessible.

I pay my taxes the same as the everyone else, and I am vehemently opposed to all attempts to close the forest to ATV pleasure traffic.
