Comments: I am a local to the area that these proposals are being made. So this will have a serious impact on me, my family and our community. I have reviewed the maps of the alternative proposals. On alternative 2 and 3 I am seeing some already well established roads and trails that are showing they will be closed. I am against the closing of most if not all of these areas that I have reviewed and that I have interest in for recreation, hunting, camping, getting wood for winter, and all other activities we freely enjoy. Given these 3 alternatives based on the areas I reviewed and what the impact will be the only alternative that makes any sense is alternative 1.

I feel there was a missed opportunity though. We should be looking to designate additional access but we should not be looking to take away that access. The additional access of the alt2 should have been considered to just ADD to alt1. If that were the case I would support it. But it's looking like there is an extreme amount of access that is being attempted to be taken away in alt2 and alt3 so that leaves alternative 1 the only choice for someone who loves this area and the access we enjoy to go about and enjoy our time in this forest.
