Comments: Any proposal to close off public lands for public travel other than for temporary winter closures is asinine. That land is used by everyone and should stay that way. Better enforcement of current laws will aid in helping keeping roads/trails suitable for all to use. Closing access to vehicle traffic will only increase competition/conflict in areas where the public could park. Law enforcement in the area would be busy with assault, theft, and traffic calls at trailheads area parking lots. Thousands of acres would instantly be off limits to those who arent extremely mobile.
