Comments: Please refer to the 2015 AZ House Bill 2175 referring to federal RS2477 regarding rights of way across public lands. RS2477 is essentially a subpart of the 1866 Mining Laws that guarantee public access to ANY roads existing prior to 1976. They cannot legally be closed by USFS or BLM, etc. AZ Attorney General Mark Brnovich affirmed this in 2017.

These trails should not be closed. The people use these trails for various reasons like, hunting, camping, and off road riding. Certain trails give solitude to those who are dedicated to off road riding, by creating a specific need to have a worthy machine to get over certain trails. Do not take this away, by closing the trails.
