Comments: I support version 3, with less intrusion into what is left of these woods. There is such a problem with trash, shooting, vehicle damage to the environment and infamous poaching in these woods. I don't wish for those people who believe it is their "right" to do whatever with public land to have easier access into the interior and further degrade it.

We need to maintain land with no access to anyone to serve as refuges from ourselves and help protect the flora and fauna.
