Title:

Comments: I have worked and lived in this area my entire life. I would hate to see this implemented. I believe that this would turn into a play ground for the ones that have the keys. The forest should remain open to any and all residents from near and far. It would impact a lot of people from earning a living, camping, hunting, fishing, and wood gathering. Imagine how many people rely on these mountains to keep their home warm in the winter. This is taking away from what I believe is a good thing, I have enjoyed my time in the mountains and I hope that my grandkids and their kids can continue and be able to enjoy the things I have as well. Closure is not the answer!
