First name: John

Last name: Welker

Organization:

Title:

Comments: I understand the need to manage and protect our public lands. I hike, hunt, camp and backpack all over the National Forests of Arizona. I have witnessed many ill-mannered, arrogant people trashing our forests. Unfortunately, these are the very people who will ignore the rules and do whatever they please. Widespread closures in the Apache Sitgreave will only punish those of us who already respect the laws and treasure the countryside. If only the perpetrators could be punished for their actions, the rest of us could continue to responsibly utilize public land. Please take this into consideration before making your decision.

Thank you, John
