Comments: It is so important that we are able to share such a great treasure for generations to come and the Mogollon Rim should remain open to the public. I believe that the community of Payson and the surrounding areas would be deeply affected by such closure. It allows for the northern counties to flourish economically and puts Arizona on the map for travel and exploration. Making any stretch of The Rim inaccessible will only hinder the Rangers ability to control the management of wildlife and environmental damages that could result from new trails and illegal campgrounds being created.
