Title:

Comments: This is not acceptable the forest is supported by tax dollars, fees and permits paid by outdoor enthusiasts. Your closing the forest trails for a political agenda nothing else. We use the trails for our recreation and to feed our families. If we didn't have the forest to take the next generations into they would only know city life which is filled with the ugliness of the world not the beauty. As a property owner which borders the national forest if find this outrageous and insulting. The Apache Sitgraves didn't bend to the environmentalist on clearing the forest for fire control why give in now!!!
