Title:

Comments: Why is it that the Forest Service closes gates and restricts U.S. Citizens from entering certain areas of their forest ? When I say "Their Forest", I mean they think it belongs only to them. " What belongs to everyone, belongs to no one." The Forest does not belong to USFS ! It belongs to everyone equally. The USFS is only suppose to manage the Forest. They can not close any of the Forest for their interest. The Road in question is part of the Historic General Crook Military Trail, built in the 1870's. The Military Trail went along the Rim from Fort Verde (Now Camp Verde) to Fort Apache. The General Crook Trail began at Fort Whipple (Near Prescott). The Forest belongs to all of us. "What belongs to Everyone belongs to No One".
