Comments: I use these campsites that are more than 300' from the main road by using the user created roads. The further distance creates a great sense of privacy to me and my family as we camp. It is very enjoyable to be at these sites and away from the traffic of the main road. I know it is the goal of the Forest Service to preserve the forest and I absolutely agree which is why I always pack out my trash and keep my foot traffic to the campsite. But closing these roads will make it too difficult for me to pack in all my camping gear for an extended trip.
