Comments: We love this area, my family and i have drove all over these forest roads .we go out and clean up so we understand the concens,but closing it off to those of us who respect it and love it is not the answer. How can we teach our children and grandchildren the importance and beauty of our land and nature without the ability to take them out to areas like this. So much of the camping areas have been closed off its turning it into a thing of the past.
