Comments: We live on the forest on the east side of Pinetop Country Club and at least 3 times a year look out to see full size pick-up trucks, SUV's or ATV's driving across the forest where no road exists. When walking the hiking trail behind us toward Buck Springs tank there is an old logging road visible but then it disappears and there is nothing behind us. Is there any way to place signs somewhere that indicate no motorized traffic is allowed. We have even seen vehicles during Stage 2 and 3 fire restriction periods. Thanks!
