Comments: To whom it may concern,

I am writing to comment on the Rico Trails project.

I support the reroute of the Spring Creek Trail and to include motorized access. This would make for better loop opportunities for motorized riders. I also support the reroute of the Ryman trail, but also would like to see motorized access be granted to this trail as well.

I also support the reroute of the Circle Trail and keeping it non-motorized access.

While I have not had the opportunity to ride this exact area, I know many folks who have and see the loss of this as a large negative affect on riders, the land, and local businesses. Myself and other riders would like to continue to see it be an inclusive of off highway motorcycle riders. Off highway motorcycle riders are great stewards of the forest and do much of the work in maintaining trails.

I appreciate the consideration on this.
