Comments: I support the land exchange. I strongly encourage CGNF to increase access to current public land holdings in the Crazy Mountains, and to increase the amount of public land holdings in the Crazy Mountains as well. Montana public lands, and access to them, are paramount to Montanans such as myself. I am a 5th generation Montanan, and I value my Montana public lands. The billionaires and corporations who own much of the adjoining private land do not share these same values. When managing public lands, I encourage CGNF to consider not just the interest of those with deep pockets, but those with deep values for public land as well.

Thank you.
