Comments: Absolute garbage that this is happening. The lack of anything from the ASNF is the laziest most worthless group of federal land managements EVER! The fires have left so much debris and blowdown on "open" roadways and trail systems...no effort is made to remark and clear these areas at all. Seriously thinking of suing their asses for all the lost time trying to find the damn trails... let alone close roads that are passable and useable while a lot of others are not!!!! Stop this effort and focus on the real big pictures.
