Comments: I am not an openent to Oil & Gas Exploration like some. But fracking in our National Forest and around our water supply reservoir, Lake Conroe? The dangers seem obvious even taking into account the safety reported by the fracking industry. Explanations from NFGT like "The contractors will have adequate insurance to cover any damage they cause" and "Contractor sites will be continually monitored" do nothing to stop possible land and water contamination; nor alleviate the indescribable damage that could be caused to our water supply, air quality, wildlife, plants and trees.
