Title:

Comments: You cannot do this to us... my family has been enjoying this area for years and always treats it with respect. It's a place where I teach my children how beautiful Mother Nature can be, and it allows us to escape from our everyday miserable lives in the city and see just how amazing the world can be. Why must the actions of a few punish those who are good people that pay their taxes and treat the land the way it should be... without this area my family and many others lose a part of their lives that brings a lot of joy and peace. This is sickening to even think about... there has to be another solution than just shutting it down, and I cannot believe this is even happening. Please... I beg you. Don't do this...
