Comments: To whom it may concern,

This is a warning that the citizens of this state will not stand for you closing access to areas of this forest that we have all enjoyed for so long. We understand that this is all part of UN agenda 21 and you will not force us out of public lands like this and force us into the cities. We are on to you and want to remind you who pays your salaries. Do not touch our forest roads or deny us access to to any of these forests. We will not stand for this at all. This isn't up to you and we will not put up with this illegal ploy and landgrab.
