First name: Tina

Last name: Overgaard

Organization:

Title:

Comments: Everybody knows that ranchers don't want any other species to compete with their cattle for grass. There was already a middle ground solution in place but the most extreme ag interests in the area removed local Nation Forest land managers through congressional intervention at the Ranger District and Forest Supervisor's office. I'm so sick and tired of the entitlements that ranchers receive. I'm tired of ranchers killing off all species, polluting our air and rivers and receiving welfare checks from taxpayers. The only group that causes a conflict are the ranchers, they are the scourge of the earth. Wake up US Forest Service and start listening to taxpayers and educated citizens and not just the special interest groups who fill the pocketbooks of greedy politicians. We are on the brink of the 7th mass extinction, I implore you to do what your organization was meant to do. Thank you.
