Comments: In regards to the proposed Sunnyside Exploration Drilling Program on the Coronado National Forests website, I am writing to voice my support for this project. Mining is critical to our economy, not only at a state level but on a world wide platform. As America lessens its dependence on foreign goods like oil and natural gas we should also lessen our dependence on minerals as well. Being a second generation native Arizonan, not only does the mining sector employ myself but friends and family. This type of drilling is crucial to understanding the quality and quantity of our mineral resources in turn securing this industry for generations to come.

Sincerely,

Tony Bodzionez
