Comments: I would like to suggest Alternative 2 IF it doesn't set precedent to close additional roads in the ASNF. Motorized access to dispersed camping and motorized access to game retrieval should be maintained. It should not be lessened any more than it is now. Adding spurs and loops to existing ATV/SUV trails seems most appropriate although it may take additional education and monitoring by USFS to show trail users how these vehicle can damage the forest in different ways. Thank you and it may be good to extend the public comment period or to hold another open house before Thanksgiving.
