Title:	
Comments: The destruction of our Alaska Wildlife & Description of the Am wouldn't get to see such a beautiful site that Alaska has given us. With global warming act worst thing we could do would cut down more trees for just dumb roads. Buy a snow vehice than cutting down over 900 aces of forest and causing less tress to produce clean air for a	cually happening the cle it's much cheaper
Alternative 1 takes no action and would leave all of Alaska under the 2001 Roadless Rule, National Forest.\	, including the Tongass
I stand by the 2001 Roadless rule and the protection of the Tongass National Forest
