Comments: Hello lawmakers and other individuals of authority,,

Please do not allow roads to be built or timber to be harvested from our precious national treasure. I understand that your communities are under economic stress, but there are modern solutions to your problems. Don't fall for the "free money" appeal of destruction. Once you harvest that timber, you will be right back in the same situation: this is not a sustainable solution.

Please consider my humble viewpoint from way down here in Appalachia, where our beautiful mountains are defaced for all to see from the highest ridge.

Sincerely,

[Position]
