Title:
Comments: I strongly request that all of Alaska including the Tongass National Forest remain in its current status under the 2001 Roadless Rule which is Alternative 1 under the draft environmental impact statement, prepared under the National Environmental Policy Act as stated in press release No. 0154.19. Allowing commercial use of these lands would result in irreversible impact, and add to negative climate change, far outweighing any private monetary benefit derived by private parties.
