Last name: Steinbach

Organization:

Title:

Comments: Please do not allow road building or logging in the Tongass National Forest. This forest is being sold off to special interest and to the benefit of a powerful few. Fisheries, tourism, and the public are all losing... mostly we are losing an important forest, but also millions of taxpayer dollars funding this . The forest itself is a important part of fighting climate change, but the jobs it supports is vital. Timber has a place, but not at the expense of all others.
